Hi Team, I didn't catch this before, but the sentence below caught my eye. Is the sentence below referring to the non-competed funds that go to the Regional Boards? If so, do we need to state that the Regional Boards are eligible to apply for these funds? I thought there was a set allocation that goes to each RB. Either way, the sentence needs a bit of adjustment. Thanks!

In 2021, California Regional Water Quality Control Boards are eligible to apply to the State Board to access \$9 million in federal funds to address priority nonpoint sources of pollution, conduct inspections, and work with stakeholders to find effective solutions for water quality problems.
